Unified Communications Certificates (UCC)

designed for use with Microsoft Exchange 2007 /2010 and Office Communications Server 2007 Networks

COMODO

Creating Trust Online®

Designed exclusively for Microsoft Exchange and Office Communications infrastructures, Comodo's Unified Communications Certificates allow a single certificate to provide SSL-secured communications for multiple domains and multiple host names operating on a single IP address.

Traditional SSL certificates provide security for a single fully qualified domain name. Wildcard certificates can cover all first-level sub domains of a domain. However, because Unified Communications Certificate support the Subject Alternative Name (SAN) field, they can support many different domains within a single certificate. This provides administrative flexibility for feature-rich environments requiring secure, client-server and server-server communications.

Offering UC Certificates will make your customer's application server implementation and administration easier and more flexible than ever before.

As an industry leader:

1. Comodo developed UCC's in partnership with Microsoft

2. Comodo is one of a very small number of Certificate Authorities licensed to offer this product to the huge Exchange/OCS customer base

3. Comodo is pleased to align UCCs to its continually expanding digital certificate portfolio

Comodo's Unified Communications Certificates help enterprises to save time and money when securing Microsoft Exchange or Office Communications messaging infrastructures and are offered to partners at outstanding discounts.

Read on to find out why reselling these certificates will give you a competitive edge and well as strong profit margins.

Key Features

- **Greater Flexibility, Economy and SSL Security for Microsoft Exchange 2007/2010 an Office Communications Server 2007 networks**

- **Provides SSL support for Microsoft Exchange 2007 / 2010 and Office Communications Server 2007 where traditional or wildcard certificates won't!**

- **Fully trusted by 99% of email clients and web-browsers**

- **Simplifies certificate management with a single certificate to support multiple domain names, host names and server applications**

- **Unlimited certificate re-issuance - have the certificate re-issued for free whenever you need to remove or change domain names**

- **Industry standard 128/256 bit SSL encryption**

- **Up to three-year certificate lifetime**

- **Backed by Comodo's 24/7 world-class Customer Support**

6 Reasons Why You Should Offer Comodo's Unified Communications Certificates.

1. Provide SSL Support Where a Wildcard SSL Won't

UC Certificates provide SSL support for Microsoft Exchange 2007/2010 and Office Communications Server 2007 where traditional or wildcard certificates won't. They are more secure than wildcard certificates since UC Certificates specify exactly which hosts and domains are to be protected and are more flexible than wildcard certificates since UC Certificates aren't limited to a single domain. For instance, a wildcard certificate can protect all first-level subdomains on an entire domain, such as *.example.com. But a wildcard cannot protect both www.example.com and www.example.net.

2. Simplify Certificate Management

Greatly simplify your Exchange Server 2007/2010 SSL configuration with a single certificate to support multiple domain names, host names and server applications. Using a UC certificate saves you the hassle and time involved in configuring multiple IP addresses on your Exchange 2007/2010 server, binding each IP address to a different certificate, and running a lot of low level PowerShell commands just to piece it all together.

For example, one UC certificate can be used to secure the following Exchange Server 2007/2010 domains: mycompany.com, owa.mycompany.com, mail.mycompany.com, smtp.mydomain.com, autodiscovery.mycompany.com, mail.mycompany-internal.com

3. Trust

UC Certificates are fully trusted by 99% of email clients and web-browsers.

4. Unlimited Certificate Re-issuance

You can have the certificate re-issued for free whenever you need to remove or change domain names.

5. Robust Margins

Highly competitive per-domain pricing makes Comodo UC certificates a more cost effective and efficient means of securing multiple hostnames, representing a lucrative sales opportunity to our partners.

6. Comodo Strength.

Partnering with Comodo brings you an ever-expanding portfolio of Internet security and identity assurance solutions of the Comodo group of companies. With over 100 technical staff focused exclusively on innovation in these core areas, Comodo partners can be assured of an ongoing stream of profitable solutions in an expanding market.

- Comodo is the world's second largest and fastest growing Certification Authority
- 7,000+ Global partners
- Securing and enabling over 1 million customers, including many of the world's largest web hosting companies, registrars and internet service providers and most respected brands.
